

## PRODUCT DESCRIPTION

P100101XX / PMMA INJ REGRIND

## TECHNICAL CHARECTERISTICS

| CHARACTERISTIC                       | VALUE                              | UNIT              | TEST METHOD             |
|--------------------------------------|------------------------------------|-------------------|-------------------------|
| Shape                                | Regrind                            |                   | Visual                  |
| Colour                               | Unicolour, Natural and Multicolour |                   | Visual                  |
| Melt mass flow rate (230 °C/3,80 kg) | 2,27 – 7,45                        | g/10 min          | EN ISO 1133             |
| Density                              | 1122 – 1193                        | kg/m <sup>3</sup> | EN ISO 1183-1, Method A |
| Particle size                        | 2,2 – 4,5                          | mm                | EN 15348:2024 (Annex A) |
| Fine particles                       | 0,2 – 17,9                         | %                 | EN 15348:2024 (Annex A) |
| Non-plastic components' content      | <2<br>(total mass, moisture-free)  | %                 | Internal                |

## ► DETERMINATION OF SPECIFICATIONS

Tests carried out, whenever possible, in an accredited laboratory in accordance with the reference standards.
